4. Infrastructure Improvements.

A. Traffic:

The Owner offers to undertake the planning, ~~permitting~~ design and construction of traffic mitigation improvements associated with the Project as provided below, including ~~an~~ the updated traffic assessment ("traffic assessment") compliant with the requirements of the NBOD Bylaw as amended prepared by Green International Affiliates, Inc. 239 Littleton Road, Westford MA which has been provided to the Town receipt of which is hereby acknowledged. The reasonable costs of said updated traffic assessment and any peer review or further revision requested following peer review shall be the responsibility of the Owner pursuant to Section III. 2 of this MOA. The requirement of a "traffic assessment", above, is in addition to the requirement of a completion of a comprehensive Traffic Impact and Access Study for the Project ("traffic impact and access study"). The "traffic impact and access study" shall be conducted prior to the Owner's submission to the Planning Board for site plan or special permit approval and said study shall accompany the first application for site plan or special permit approval. Additional off-site traffic mitigation which is identified during the Planning Board's review of site plan and special permit approvals as reasonably necessary, in conjunction with the "traffic impact and access study" shall be implemented by the Owner as specified by the Planning Board.

DRAFT

DRAFT

DRAFT

The final scope and location of the Front Door Improvements shall be determined by the Planning Board during either the Site Plan Review or special permit process, whichever is applicable. If during the Site Plan Review or the special permit process, the Planning Board determines that the above listed traffic and pedestrian improvement are not recommended, payment for those specific improvements shall not be required. However, nothing in this paragraph removes the obligation of the Owner to pay for the completion of specific traffic improvements that the Planning Board ~~shall~~may reasonably require for the development of a portion or all of the Property. Owner agrees that regardless of the specific requirements of the Planning Board, the proposed traffic signal shall be installed and made operational. If during Site Plan Review or the special permit process, the Planning Board reasonably requires additional traffic, public safety and/or pedestrian improvements along the frontage of the Property, the Owner shall pay for the reasonable costs of planning, ~~permitting~~, design, construction and operation of those additional improvements.

To the extent permitted by law, the Town agrees to cooperate with the Owner in seeking and expediting any and all approvals required for the Front Door Improvements and any other improvements to State owned or controlled highways as may be required under this MOA or the Project. It shall be the responsibility of Owner to pay for and obtain all necessary permits, licenses and approvals from the State.

The Owner offers to convey for no (zero) consideration in fee simple to the Town all land along the Property's frontage required for the Front Door Improvements, the same to be identified on both a plan and deed prepared by the Owner no later than the issuance of the first building permit for the Project. Nothing herein shall be construed as obligating the Town to accept said offer.

The Owner shall retain a traffic ~~an~~ engineer(s) licensed in the Commonwealth to monitor this intersection every six months for a period of 24 months following the issuance of the first occupancy for any building located within the Project. Reports of this data collection and analysis shall be submitted to the Town of Maynard Planning Department. This monitoring shall include turning movement counts conducted during the peak hours analyzed in the Project traffic study. Capacity analysis should be conducted using these volumes to evaluate the adequacy of the current signal operation in terms of delays, queues, and other relevant measures of effectiveness. The results of this monitoring shall be provided to the town with accompanying technical appendices for review. The first report is due six months from the date of the issuance of the first certificate of occupancy and every six months thereafter. If upon review of the Town, following consultation with Owner's engineer and/or consultants, it is determined that signal phasing and/or timing adjustments are required, the Owner agrees to make such changes and adjustments within three months and at Owner's expense.

The Front Door Improvements shall be substantially completed prior to the issuance of the first building occupancy permit for any new retail building ~~or use~~ constructed within the Property.

Comment [APC6]: Site construction, including some of the buildings will be undertaken at the same time that the Front Door Improvements are underway.
